Decent Work Exploration Grants – these are by invitation only

Leverage for

further

funding

Goal for the DW EGs

The development and design of practical and innovative proposals that can realise the goal of the Decent Work program.

Outcomes of DW EGs

Well-evidenced proposals and plans that have potential to:

- 1. Generate new solutions
- 2. Be practical and feasible
- 3. Identify and work with relevant partners
- 4. Leverage available resources and/or other funding

How exploration grants create or add value

Groups that could potentially contribute or benefit can bring valuable perspectives and resources: e.g employers/industry groups, youth cohorts, other employment, skills and community organisations that serve them

Organisations need to define the problem and formulate solutions with partners in delivery for feasibility testing, relevant evidence, costing, modelling, additional funding partners, and evaluation design

Results in Decent Work proposals

that are innovative and worthy of investment

Better quality proposals
